# FACSIMILE

DATE: August 05, 2008  
**OFFICIAL PAPER**

JOB CODE:

*Please deliver this and the following pages to:*

Examiner: **Ben C. Wang**  
U.S.P.T.O. Group Art Unit: **2192**  
Telecopier No.: **517-270-2240**  
U.S. Serial No.: **10/790,663**  
Client/Matter No.: **MSFT-2767**  
Sender's Name: **Peter Trahms-Neudorfer**  
Pages to Follow: **6**

If transmission is not complete, please call our **Seattle Office** at (206) 332-1380.

COVER MESSAGE:

**OFFICIAL FACSIMILE. PLEASE DELIVER TO EXAMINER IMMEDIATELY.**

Attached hereto is/are the following documents:

- 1) PTO Form 413A
- 2) Drafted Amendments

THIS MESSAGE IS INTENDED ONLY FOR THE USE OF THE INDIVIDUAL OR ENTITY TO WHICH IT IS ADDRESSED AND MAY CONTAIN INFORMATION THAT IS PRIVILEGED, CONFIDENTIAL AND EXEMPT FROM DISCLOSURE UNDER APPLICABLE LAW. IF THE READER OF THIS MESSAGE IS NOT THE INTENDED RECIPIENT, OR THE EMPLOYEE OR AGENT RESPONSIBLE FOR DELIVERY OF THE MESSAGE TO THE INTENDED RECIPIENT, YOU ARE HEREBY NOTIFIED THAT ANY DISSEMINATION, DISTRIBUTION OR COPYING OF THIS COMMUNICATION IS STRICTLY PROHIBITED. IF YOU HAVE RECEIVED THIS COMMUNICATION IN ERROR, PLEASE NOTIFY US IMMEDIATELY BY TELEPHONE AND RETURN THE ORIGINAL TO US AT THE ABOVE ADDRESS VIA THE U.S. POSTAL SERVICE. THANK YOU.

## Applicant Initiated Interview Request Form

Application No.: 10/790,663 First Named Applicant: Izydor Gryko  
 Examiner: Ben C. Wang Art Unit: 2192 Status of Application: \_\_\_\_\_

### Tentative Participants:

(1) Attorney Trahms-Neudorfer (2) Examiner Wang  
 (3) \_\_\_\_\_ (4) \_\_\_\_\_

Proposed Date of Interview: August 13 WEDNES Proposed Time: 4:00 P EDT AM/PM

### Type of Interview Requested:

(1) ☒ Telephonic (2) ☐ Personal (3) ☐ Video Conference

Exhibit To Be Shown or Demonstrated: ☐ YES ☐ NO

If yes, provide brief description: drafted amendments

### Issues To Be Discussed

Issues (Rej., Obj., etc)	Claims/ Fig. #s	Prior Art	Discussed	Agreed	Not Agreed
(1) <u>Rej. Claims</u>	<u>1-5, 7-12, 14-19 &amp; 21</u>		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(2) <u>Rej</u>		<u>Dardinsk.</u>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(3) _____	_____	_____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(4) _____	_____	_____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

☐ Continuation Sheet Attached

### Brief Description of Argument to be Presented:

Discussion of the Dardinski reference relative to the  
independant claims (see draft reply).

An interview was conducted on the above-identified application on \_\_\_\_\_.

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.

Applicant/Applicant's Representative Signature  
Peter Trahms-Neudorfer  
 Typed/Printed Name of Applicant or Representative  
59,282  
 Registration Number, if applicable

Examiner/SPE Signature

This collection of information is required by 37 CFR 1.133. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 21 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.  
 If you need assistance in completing this form, call 1-800-PTO-9199 and select option 2.

**DOCKET NO.:** MSFT-2767/305783.01  
**Application No.:** 10/790,663  
**Office Action Dated:** April 30, 2008

**PATENT**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Currently Amended) A method for building an extensible project system comprising:

providing a base project object comprising data for creating a project system, wherein the base project object implements a base project configuration object that includes configuration properties for the base project object, the configuration properties comprising at least one of an indication of a build of the project system, an output file to be created, or an indication as to where the output file[[d]] will be placed;

providing at least one flavor object comprising data for modifying said project system for a specific purpose, wherein the at least one flavor object includes flavor-specific project configuration properties comprising at least one of a caption of a project node, an icon of a project node, a property allowing a project browse object to be completely overridden, a control allowing a project to be renamed, a sort priority control, a property allowing a command to be added, a property allowing a command to be removed, a property allowing a command to be disabled, a filter, a property allowing a default generator given a file extension to be determined, or a property allowing a human-readable generator name to be mapped to a COM object;

signaling by the base project object to the at least one flavor object that the base project configuration object needs to be extended;

creating a flavored project system adapted for said specific purpose by object aggregation using said base project object as a participating object and one of said at least one flavor objects as a controlling object; and

creating, by the at least one flavor object, a flavored base project configuration object, wherein at least one configuration property for the base project object is modified by a corresponding flavor-specific project configuration property.

2. (Original) The method of claim 1, where said at least one flavor object comprises at least a first flavor object and a second flavor object, and where said step of creating a flavored project system comprises:

**DOCKET NO.:** MSFT-2767/305783.01  
**Application No.:** 10/790,663  
**Office Action Dated:** April 30, 2008

**PATENT**

creating an intermediary object by aggregating said first flavor object as a controlling object and said base project object as a participating object; and

creating a flavored project system by using said second flavor object as a controlling object and said intermediary object as a participating object.

3. (Original) The method of claim 1 where said step of creating a flavored project system comprises allowing at least one interface of said base project to be modified by said flavor object.

4. (Original) The method of claim 3 where said step of creating a flavored project system comprises allowing a value for at least one property stored in said at least one interface of said base project to be modified by a value for said at least one property stored in an interface of said flavor object.

5. (Original) The method of claim 1 where said step of creating a flavored project system comprises allowing at least one interface of said base project to be replaced by said flavor object.

6. (Canceled)

7. (Previously Presented) The method of claim 1, wherein said flavored base project configuration object includes an extender interface, said creation of a project system further comprising:

providing an extender site object associated with said extender interface.

8. (Currently Amended) A system for building an extensible project system comprising:

a process configured to instantiate a base project object comprising data for creating a project system, wherein the base project object implements a base project configuration object that includes configuration properties for the base project object, the configuration properties comprising at least one of an indication of a build of the project system, an output file to be created, or an indication as to where the output file[[d]] will be placed;

**DOCKET NO.:** MSFT-2767/305783.01  
**Application No.:** 10/790,663  
**Office Action Dated:** April 30, 2008

**PATENT**

a process configured to instantiate at least one flavor object comprising data for modifying said project system for a specific purpose, wherein the at least one flavor object includes flavor-specific project configuration properties;

a process in the base project object configured to signal the at least one flavor object that the base project configuration object needs to be extended;

a process configured to generate a flavored project system for said specific purpose by object aggregation using said base project object as a participating object and one of said at least one flavor objects as a controlling object; and

a process in the at least one flavor object configured to generate a flavored base project configuration object, wherein at least one configuration property for the base project object is modified by a corresponding flavor-specific project configuration property.

9. (Original) The system of claim 8, where said at least one flavor object comprises at least a first flavor object and a second flavor object, and where said aggregator further comprises:

a first aggregator for creating an intermediary object by aggregating said first flavor object as a controlling object and said base project object as a participating object; and

a second aggregator for creating a flavored project system by using said second flavor object as a controlling object and said intermediary object as a participating object.

10. (Original) The system of claim 8 where said aggregator causes at least one interface of said base project to be modified by said flavor object.

11. (Original) The system of claim 10 where said aggregator causes a value for at least one property stored in said at least one interface of said base project to be modified by a value for said at least one property stored in an interface of said flavor object.

12. (Original) The system of claim 8 where said aggregator causes at least one interface of said base project to be replaced by said flavor object.

13. (Canceled)

**DOCKET NO.:** MSFT-2767/305783.01  
**Application No.:** 10/790,663  
**Office Action Dated:** April 30, 2008

**PATENT**

14. (Previously Presented) The system of claim 8, wherein said flavored base project configuration object includes an extender interface, said project system further comprising:

an extender site object associated with said extender interface.

15. (Currently Amended) A computer-readable storage medium for building an extensible project system, said computer readable storage medium storing instructions for causing a computer to perform the steps of comprising:

providing a base project object comprising data for creating a project system, wherein the base project object implements a base project configuration object that includes configuration properties for the base project object, the configuration properties comprising at least one of an indication of a build of the project system, an output file to be created, or an indication as to where the output file[[d]] will be placed;

providing at least one flavor object comprising data for modifying said project system for a specific purpose, wherein the at least one flavor object includes flavor-specific project configuration properties;

signaling by the base project object to the at least one flavor object that the base project configuration object needs to be extended;

creating a flavored project system for said specific purpose by object aggregation using said base project object as a participating object and one of said at least one flavor objects as a controlling object; and

creating, by the at least one flavor object, a flavored base project configuration object, wherein at least one configuration property for the base project object is modified by a corresponding flavor-specific project configuration property.

16. (Previously Presented) The computer-readable storage medium of claim 15, where said at least one flavor object comprises at least a first flavor object and a second flavor object, and where said step of creating a flavored project system comprises:

creating an intermediary object by aggregating said first flavor object as a controlling object and said base project object as a participating object; and

**DOCKET NO.:** MSFT-2767/305783.01  
**Application No.:** 10/790,663  
**Office Action Dated:** April 30, 2008

**PATENT**

creating a flavored project system by using said second flavor object as a controlling object and said intermediary object as a participating object.

17. (Previously Presented) The computer-readable storage medium of claim 15 where said step of creating a flavored project system comprises allowing at least one interface of said base project to be modified by said flavor object.

18. (Previously Presented) The computer-readable storage medium of claim 17 where said step of creating a flavored project system comprises allowing a value for at least one property stored in said at least one interface of said base project to be modified by a value for said at least one property stored in an interface of said flavor object.

19. (Previously Presented) The computer-readable storage medium of claim 15 where said step of creating a flavored project system comprises allowing at least one interface of said base project to be replaced by said flavor object.

20. (Canceled)

21. (Previously Presented) The computer-readable storage medium of claim 15, wherein said flavored base project configuration object includes an extender interface, said creation of a project system further comprising:

providing an extender site object associated with said extender interface.
